Java Developer · Core Java & OOP · Spring Boot · REST APIs · SQL

Professional Summary

Java Developer with **1+ year of full-time experience** building production features in **Java 17, Spring Boot 3, JPA/Hibernate, and PostgreSQL** on a multi-tenant SaaS platform. Strong foundation in **Core Java and Object-Oriented Programming** (encapsulation, inheritance, polymorphism, abstraction), applied in layered Spring Boot code, with data structures and problem-solving fundamentals. **2025 B.E. graduate in Electronics & Communication Engineering (ECE)**; a clear communicator, team player, and eager learner.

Technical Skills

- **Programming Languages:** Java 17 (Core Java), C++ (Basics), SQL
- **Core Java & OOP:** Classes & Objects, Encapsulation, Inheritance, Polymorphism, Abstraction, Interfaces & Abstract Classes, Collections Framework, Exception Handling
- **Data Structures & Problem Solving:** Arrays, Strings
- **Java Backend:** Spring Boot 3, REST APIs, Spring Data JPA/Hibernate, Spring Security, OAuth 2.0, JWT, Maven
- **Database:** PostgreSQL
- **Soft Skills:** Communication, Presentation, Teamwork, Professional Attitude, Willingness to Learn
- **Languages Spoken:** English, Kannada, Telugu

Professional Experience

ProBits Technology Pvt Ltd Bengaluru, India
Associate Software Developer *June 2025 – Present*

- Full-stack developer on Savoira: built **Java 17 / Spring Boot 3** REST APIs, business logic, and **JPA/Hibernate** persistence over PostgreSQL, plus React UIs — owning features from requirements through production release.
- Collaborated in an **Agile/Scrum** team through sprint planning, code reviews, and pair programming with senior developers; delivered work via Git feature branches and pull requests.

Savoira — Multi-Tenant SaaS Platform *Dec 2025 – Present*
Java 17, Spring Boot 3, Spring Security, Spring Data JPA/Hibernate, PostgreSQL, Flyway, OAuth 2.0, JWT, React 18, Redux

- **REST APIs & Reporting:** built **17 Spring Boot REST endpoints** powering 8 report sections across 2 analytics dashboards with KPI-to-record drill-down; wrote a reusable `DateRangeResolver` for all report filters.
- **Security — OAuth 2.0:** integrated 3 OAuth providers (Google, Microsoft, Meta WhatsApp Business) with per-tenant configuration, signed state parameters for CSRF protection, and encrypted token storage at rest.
- **Data Privacy:** designed a token-based public sharing flow whose unauthenticated REST endpoint returns only explicitly whitelisted fields, preventing PII exposure.
- **Problem Solving:** implemented a text-matching module that maps free-text requirement descriptions to trainer competencies, covered by unit tests, plus profile-strength scoring that flags incomplete records.
- **Workflows & Audit Trail:** built versioned document upload with mandatory change-reason capture and revision history, and a task module (assignment, status transitions, due dates) with a full audit trail.
- **Database Design:** modeled PostgreSQL tables with JSONB and GIN indexing, evolved via Flyway migrations.
- **Frontend:** architected the app-wide design system (144 design tokens, 8 UI primitives, 50+ React components) and migrated the Trainer, Vendor, and Client modules onto it with zero API-contract regressions.

Timesheet Management Application *React, Redux, Node.js, Express.js, PostgreSQL* *June 2025 – Nov 2025*

- Built a full-stack app to track employee work hours and project tasks: REST APIs for timesheet submission, approval, and reporting over PostgreSQL, with role-based access control for employees and managers.

Education

Rajarajeswari College of Engineering Bengaluru, India
B.E. in Electronics & Communication Engineering (ECE); CGPA: 8.15 *2021 – 2025*
Vidyavahini PU College, Bengaluru — *PUC (PCMB); 84%* *2018 – 2020*
Manjushree English School, Bengaluru — *Class X, Karnataka State Board; 83%* *2018*

Certifications

Full Stack Development — KodNest *July 2025*
Claude 101 — Anthropic *March 2026*
